**[IANA #947741] AutoReply: General Request for Assignment**

1 message

---

**IANA General Enquiries via RT** <iana-questions@iana.org>

Fri, Feb 3, 2017 at 5:55 PM

Reply-To: iana-questions@iana.org

To: bluroofmusic@gmail.com

To whom it may concern:

This is an automatically generated message to notify you that we have received your request, and it has been recorded in our ticketing system with a reference number of 947741.

There is no need to reply to this message right now. IANA staff will review your message shortly.

If this message is in reply to a previously submitted ticket, it is possible that the previous ticket has been marked as closed. As we review this ticket, we will also review previous correspondence and take appropriate action.

To expedite processing, and ensure our staff can view the full history of this request, please make sure you include the follow exact text in the subject line of all future correspondence on this issue:

[IANA #947741]

You can also simply reply to this message, as this tag is already in the subject line.

Thank you,

IANA Services

Type of Assignment:

Permanent registration updates in IPP Registry

Copy of revised IANA XML registry is at:

<http://ftp.pwg.org/pub/pwg/ipp/IANA-IPP-registrations/>

in the file Copy of revised IANA XML registry is at:

<http://ftp.pwg.org/pub/pwg/ipp/IANA-IPP-registrations/>

in the file ipp-registrations-20170203.xml

## Changes:

- print-quality value 3 was "rfc" instead of "draft"
- job-password-encryption-supported deprecated values should be under job-password-encryption
- added missing xri-authentication-supported values (negotiate and oauth)
- device-service-count had misspelled integer in the syntax
- Dropped media-input-tray-check-default/supported (not in 5100.3)
- Several attributes had reference text stuck in the syntax field (removed)
- media-col.media-size was not expanded with x-dimension and y-dimension sub-member attributes (PWG 5100.3)
- job-delay-output-until values were not registered (PWG 5100.11)
- job-constraints-supported and job-resolvers-supported were missing the resolver-name (PWG 5100.13)
- print-scaling values were not registered (PWG 5100.16)
- job-destination-spooling-supported values were not registered (PWG 5100.17)
- compression-accepted and document-format-accepted were not registered (PWG 5100.18)
- Added pending vendor registrations from Apple, Canon, and HP

## Registry:

IANA IPP Registry

<http://www.iana.org/assignments/ipp-registrations/ipp-registrations.xml>

## Description:

Proposed: Mike Sweet (Apple)

Reviewed: By IETF Designated Experts for IPP Registry

Approved: 3 February 2017

By: Ira McDonald (IETF Designated Expert for IPP Registry)

## Additional Info:

Brings IANA IPP Registry (from RFC 8011) up-to-date for recent  
PWG IPP attribute registrations
