IPPv2 Conference Call Minutes: February 14, 2008

Attendees:

Attendee	Company
Ron Bergman	Ricoh
Harry Lewis	InfoPrint Solutions
Ira McDonald	High North
Joe Murdock	Sharp
Chris Story	Ricoh
Jerry Thrasher	Lexmark
Paul Tykodi	Tykodi Consulting
Pete Zehler	Xerox

Discussion:

Ron presented two documents as a starting point for discussion. They can be found at:

ftp://ftp.pwg.org/pub/pwg/ipp/ippv2-info/IPP-SPECIFICATIONS.pdf

ftp://ftp.pwg.org/pub/pwg/ipp/ippv2-info/IPP-COMMANDS.pdf

Ira proposed that we consider IPP 2.0 to be composed of:

- The Document Object (PWG 5100.5 and
- The optional operations from RFC 2911.

…then IPP 2.1 add the System Administration Operations (RFC 3998).

Ira will try to obtain a list of the supported operations and attributes from Norm Jocobs regarding Open Solaris.

We have obtained a list of the supported operations in CUPs. This information is available in the CUPs documentation.

The possibility of obtaining information regarding the extent of support within printers was also discussed. IBM may have information relative to this discussion and Paul Tykodi will attempt to obtain

Could we send out a questionnaire to member companies asking what they would prefer to see in IPP 2.0?

Next teleconference will be at the normal time (11 AM EST) on February 21. I apologize for the mixup on times and date for this call.
