

IPPV2 Conference Call Minutes

March 20, 2008

Meeting was called to order at approximately 11 am (EST) March 20, 2008.

Attendees

Ron Bergman	Ricoh
Ira McDonald	High North
Craig Whittle	Sharp
Glen Petrie	Epson
Peter Zehler	Xerox
Lee Farrell	Canon

General Discussion

- ❖ Minutes from the January 3rd teleconference (see <ftp://ftp.pwg.org/pub/pwg/ipp/ippv2-minutes/IPPV2-ConCall-Minutes-20080306.pdf>) were approved.
- ❖ Review of action items:
 - Ira: Obtain a list of IPP operations supported by Open Solaris (complete)
 - Ron: Create spreadsheet with IPP operations to be supported in IPPv2 for vendor input.
 - Glen: Update document describing IPP operations implemented (see below).
- ❖ The document summarizing IPP operations supported by different vendors are summarized in <ftp://ftp.pwg.org/pub/pwg/ipp/ippv2-info/IPP-Operations-Supported-By-Solutions.pdf>
 - Private extensions are not all published. In some cases vendor just publish a code (by design).
 - CUPS, Solaris and Novell may want to make it some of their private operations public—especially if they are supported by a significant number of vendors.
 - Operations already existing can be incorporated into IPPv2. Scope does not include defining new operations.

- Glen took list of IPP operations from the CUP 1.3 listing on their Web site. May need to verify some of the operations. Ira to send link to Glenn to update his document.
- ❖ Ron to take the specifications and breakout the operations into a spreadsheet. The spreadsheet will be distributed to the e-mail list with a request for input to establish priorities for operations supported in IPPv2 using the following criteria:
 - A = Essential
 - B = Useful but not critical
 - C= Not necessary

Next Steps / Open Actions:

- ❖ Ron will send a notice prior to the next teleconference—either April 3rd or 10th.
