  - Section 7.9:
    - Table 8:
      - Additions to "finishings-col-database" and "finishings-col-ready"
      - Do we need max-sheets since we have media-sheets-

supported? Smith will look up the prior discussions to confirm

- Line 1331: "A Printer SHOULD list ... to allow a Client to discover"
- Lines 1403-1408: Use wording from JOBEXT for media-col-database - declarative wording ("can exclude") in order to limit the number and size of values
- Section 7.9.1:
  - Add "imposition-template" Job Template reference to PPX 2 (member attribute is the default, explicit attribute replaces the default)
  - "defined by THE collection" (as in this "finishing-col" value)
  - Drop last sentence
- Section 7.9.3/4:
  - Clean up so they read in the same order for consistency
- Section 7.10:
  - Second paragraph: "Printers SHOULD omit all media-specific member attributes from the collection values."
- Section 7.17:
  - Drop second sentence
  - "A Printer MUST report a value of 'true' ..."
  - Drop last sentence
- Section 7.18
  - Line 1635: drop period before section reference
  - Move last sentence to a new paragraph:
    - Note: Prior versions of this specification did not require the "punching-hole-diameter-configured" Printer Description attribute. ... a Client can assume the value ... (instead of SHOULD)
- Finished the whole document!
