August 30, 2019 (US Mountain Daylight Time)

When	What
09:00 - 10:00	IPP WG: Errata Review
10:00 - 11:00	IPP WG: 3D Printing Liaisons and Topics
11:00 - 11:30	Lunch
11:30 - 13:00	IPP WG: 3D Printing Metadata BoF + 3D PDF
13:00 - 13:15	IPP WG: Next Steps

- **PWG 5100.1-2017: IPP Finishings v2.1 (FIN)**
 - Section 11.1 doesn't mention the "punching-hole-diameter-configured" and "stitching-angle" attributes, and related language, to clarify that punched holes are round and of a particular size, and to define that staples' axis of rotation is around their midpoint and have a particular rotation, to more specifically define the coordinates of the space occupied by the punched holes and staples.
- **PWG 5100.6-2003: IPP Page Overrides**
 - Add a note to remind people to always support the 'document-number' keyword in "overrides-supported" for interoperability reasons.
- **PWG 5100.9-2009: IPP Printer State Extensions v1.0**
 - Regarding the xxx-recoverable-storage-error keywords for printer-state-reasons, we need to remove the "-error" to conform for the RFC 2911 rules for printer-state-reasons values (-error means the printer is stopped; the printer may not be stopped for recoverable errors).

Errata Review (con't)

- PWG 5100.12-2015: IPP 2.0, 2.1, and 2.2
 - Update references to specifications
- PWG 5100.15-2014: IPP FaxOut Service
 - Abstract says "this standard" instead of "this specification"
 - Clarify that phone lines are considered a "secure medium"
- PWG 5100.16-2015: IPP Transaction-Based Printing Extensions
 - Remove mention of "finishings" attribute in section 4
 - Update rationale in section 3.1 (remove redundancies)
 - Add periods to ends of sentences on page 10
- PWG 5100.18-2015: IPP Shared Infrastructure Extensions
 - Add missing operation attribute definitions/registrations
 - Add reference to RFC 6750 for OAuth
 - Clarify usage of UUIDs for devices, output-device-uuid-supported
 - Add missing table-of-contents links to generated PDF

Errata Review (con't)

- **PWG 5100.19-2015: IPP Implementor's Guide v2.0**
 - Fix job-constraints-supported example in section 5.9
 - Talk about 5xx responses to the Expect header in section 8.2
 - Talk about printer-resolution vs. document resolution
 - Make sure all attribute names are enclosed by double quotes
 - Add diagrams showing authentication (or just reference IPP Authentication Methods BP)
 - Talk about power management and discovery - doing a DNS-SD resolve + query will wake up all printers, vs. just doing a browse and only resolving and querying once selected

3D Printing Topics

- Work to get wide adoption of IPP 3D v1.1 and PWG Safe G-Code Subset v1.0
 - Reach out to vendors - point to IPP sample code
 - Both local printing and cloud
 - Can we develop a GUI client prototype?
- Concrete printing
 - Material types
 - Determine whether other material properties are needed (additives, amount of water, etc.)
 - Other print ticket properties needed?
- Liaisons (next slide)
