Agenda

May 3, 2017

When	What
12:30 - 1:30	IPP Workgroup Status and Updates
1:30 - 2:30	IPP System Service

May 4, 2017

When	What
12:30 - 1:45	White Papers
1:45 - 2:15	PWG 3D Print Job Ticket
2:15 - 2:30	Next Steps

"Get-User-Printer-Attributes" Proposal

- White Paper:
 - <http://ftp.pwg.org/pub/pwg/ipp/whitepaper/tb-userop-20170404.pdf>
- Get-User-Printer-Attributes Operation
 - Provides a Get-Printer-Attributes response filtered by the most authenticated user
 - Useful for things like limiting which users can print in color, use a particular letterhead, etc.
 - Clients that support the operation will only show available print options to the user instead of reporting an error (or having the options silently overridden by the Printer) when the user submits the job
 - Needed because Get-Printer-Attributes is not defined as an authenticated operation (so no clients support it), nor does it include the "most authenticated user identity" as a filter criteria (which isn't something we can expose using "printer-get-attributes-supported")

"IPP Presets" Proposal

- White Paper:
 - <http://ftp.pwg.org/pub/pwg/ipp/whitepaper/tb-ipp-preset-20170418.pdf>
- "presets-col" and "presets-col-set" Printer Description attributes
- Provides a way for Clients to know that selection of one Job Template attribute value should also select others, e.g., selecting 4x6 media should also trigger "print-quality" getting set to 'high'.

PWG 3D Print Job Ticket

- Current stable draft:
 - <http://ftp.pwg.org/pub/pwg/ipp/wd/wd-smpjt3d10-20170420-rev.pdf>
- Current schema:
 - <https://istopwg.github.io/ippregistry/smpjt3d10-current>
- Proposed schedule:
 - WG Last Call Q2 2017
 - PWG Last Call and Formal Vote Q3 2017
