

# PWG WIMS

## Conference Call Minutes

May 10, 2010

Bill Wagner. Chair PWG WIMS/PMP

### 1 Attendees

Glen Petrie	Epson
Ira McDonald	High North (Samsung)
Bill Wagner	TIC

### 2 General

- Meeting was convened at 2:00PM EDT on 10 April, 2010.
- Bill Wagner agreed to take minutes
- Notice was made that the meeting was held in accord with the PWG Intellectual Property Policy. There were no objections.
- Minutes of 26 April were accepted.

### 3 Action Items Review

- Ira will update and post Stable version of PWG Device ID "COMMAND SET" document (done)
- Bill Wagner will send message to SC that last call comments on the Command Set document appear to be resolved (done) – Document now in ballot stage to end on Monday 31 May 2010. (<ftp://ftp.pwg.org/pub/pwg/pmp/wd/wd-pmp1284cmdset10-20100427.pdf>)
- Ira will post "Additional langPDF/PS/PCL variants" memo to PWG Announce and allow two weeks for responses before submitting to IANA (done)
- Ira will update and post Imaging Power Model documents, and MIB spec (done)
- Ira will generate a distribute suggested Power Management query for MPSA (done)
- On agreement of MPSA query, it will be forwarded to Jim Fitzpatrick (done)
- Rick Landau and Ira McDonald: review Print Service related MOFs, generate CRs, and submit to CIM (open)

### 4 Consideration of Email comments on "Additional langPDF/PS/PCL variants" memo

- Several comments were received and resolved via email.
- Suggestion to change some current entries in IANA MIB were discouraged because disrupting the current parts of the document when there was no compelling reason to do so did not appear reasonable.
- The call for comments will remain open until 14 May. If no unresolved comments remain then, the proposed changes will be sent to IANA

### 5 Consideration of updated Imaging Power Model and MIB Documents

- The updates to the Power Model document (<ftp://ftp.pwg.org/pub/pwg/wims/wd/wd-wimspower10-20100428-rev.pdf>), the Power MIB specification (<ftp://ftp.pwg.org/pub/pwg/wims/wd/wd-wimspowermib10-20100428.pdf>), and the Power MIB (<ftp://ftp.pwg.org/pub/pwg/wims/wd/wd-wimspowermib10-20100428.mib>) were reviewed and it was agreed that the changes address the comments made at the last WIMS Concall.
- These documents now await results of the MPSA investigation and the experiences from prototyping before they can be advanced.

### 6 Consideration of PWG-MPSA interaction on Imaging Power Model

- We will await Jim Fitzgerald's suggestions on how to proceed with MPSA member consideration.

- Ira suggested that MPSA focus group members be invited to participate the WIMS face-to-face meeting in June.

## **7 Next Steps – Action Items**

- Action Items:
  - a. Follow 1284 ID Command String document voting and encourage member participation (Bill & Ira)
  - b. Continue communication with Jim Fitzgerald relative to Imaging Power Management requirements query (Bill)
  - c. Follow up with “Additional langPDF/PS/PCL variants” submission to IANA after 14 May end of comment period and all comments have been resolved – Ira
  - d. Rick Landau and Ira McDonald: review Print Service related MOFs, generate CRs, and submit to CIM (open)
- Next Conference Call is at 2:00 PM EDT on 24 May.
- Subjects for the June face-to-face were considered. It is expected that there will be an update on Power Management efforts and possibly some processing of MPSA input, perhaps with MPSA member participation.
- Future WIMS Activity was discussed. The Power Management documents await prototyping. The PWG membership has shown little interest in the new WIMS activities that have been suggested, including update and advancement of the Port Monitor MIB, CIM Printer Profile Activity, MFP Alerts etc. Therefore, except for possible projects coming out for MPSA liaison, it might be appropriate for WIMS to suspend activity after the June Face-to-face meeting.
